

PROJECT APPLICANT: Town of Southampton

PROJECT TITLE: Round Pond Stormwater Mitigation and Wetlands Restoration Project

PROJECT TYPE: Aquatic Mitigation; Aquatic Habitat Restoration

SCALE: Neighborhood/Watershed

APPROACH: **Reduction** - Stormwater diversion, reduction into Round Pond. Removal of bulkhead, pavement, and natural habitat restoration
Restoration - Habitat Restoration

DESCRIPTION

Removal of approximately 150 linear feet of roadway and the existing bulkhead upland of Round Pond. Installation of drainage infrastructure and development of a rain garden to act as a sediment fore bay and filter for the estimated 25,000 cubic feet of stormwater that has the ability to enter the Pond from this roadway. The project will also restore a natural shoreline to the pond, this will allow for natural habitat for local species and fauna to thrive and prosper. The proposed work will also include for the re-alignment of a driveway into 1170 Middle Line Highway a Town CPF property.
