

**PROJECT APPLICANT:**  
**PROJECT TITLE:**

**Town of Southampton**  
**Alewife Creek Restoration**

**PROJECT TYPE:**

Wastewater Treatment Improvement Project

**SCALE:**

Neighborhood/Watershed

**APPROACH:**

**Reduction, Remediation, Restoration**

**DESCRIPTION**

The proposed Alewife Creek Habitat Enhancement project will protect the subject alewife run of North Sea Harbor from sea level rise associated with climate change by: restoring appropriate creek flow through the modification of an existing culvert under Noyac Rd., reduce stormwater pollutants by providing stormwater collection/treatment and drainage in accordance with the NYSDEC Stormwater Management Design Manual and including fish-friendly enhancements which will allow a greater portion of the alewife population to reach their freshwater spawning grounds.

**PROPOSED PROJECT**

Alewife Creek

Existing Culvert Opening

**MAP OF PROJECT LOCATION**

**TOTAL CPF FUNDS REQUESTED**  
**RECOMMENDED FUND AWARD**

**\$ 610,000**  
**\$ 410,000**
