There are no minimal submission requirements other than this request form and a survey of the property. The level of effectiveness of this Council, however, will depend on the degree of information that the project sponsor is able to provide.

The scope of the Council includes, but is not limited to: non-administrative site plan applications; subdivision applications; zoning variance applications; and any project or application requiring review by more than one Town agency or board (excluding PDD or change-of-zone applications).

While not mandatory, applicants may request to meet with the Council in order to facilitate a more productive working relationship, guiding an applicant through the process in a way that avoids confusion; provides accurate, consistent information; and identifies, fosters and maintains consistency in the process. Requested meetings ideally would occur before making an initial submission or application to the Town, however, requests can be made after commencing an application.

By resolution 2012-641, on June 12, 2012, the Town Board created the Project Development Council, comprised of representatives from several Town Departments, with the objective of providing a forum that encourages dialogue between applicants for land use development proposals and various Departments.
