GET YOUR **FREE** HOME ENERGY AUDIT TODAY!

- ✔ Find the areas where your home is wasting energy
- ✔ Fix problem areas with affordable energy upgrades
- ✔ Save \$1,000 a year on your home energy bills
- ✔ Make your home more comfortable year round

How it Works

Regardless of where you live, every Long Island homeowner can participate in this program.

Long Island Green Homes makes energy efficiency simple and easy. Start by calling us at **800-567-2850** or by filling out our webform at **longislandgreenhomes.org**. Our trained Energy Navigators will pre-qualify your family and assist in identifying rebates, discounts, financing, and ensure that you understand everything for which you are eligible. We will schedule your Free Home Energy Assessment (a \$400 value), that provides a detailed plan for the upgrades you can choose that will save you money and improve the comfort of your home. Our experienced Energy Navigators are not salespeople. They are here for you every step of the way. Have questions? Just ask.

Additional programs may exist for low- to moderate-income families. Speak to your Energy Navigator for more information on programs for which you may qualify.

- ✔ **The FREE energy assessment is the first step to lowering your energy bills, while making your home more comfortable year-round.**
- ✔ **Learn where your home's biggest energy efficiency gains can be made.**
- ✔ **Receive a comprehensive study of your home's energy use conducted by a certified professional.**
- ✔ **Fix any problem areas in your home with affordable energy improvements.**

What Makes Us Different

Long Island Green Homes is different because we are a non-profit collaborative project of trusted Long Island towns, community-based organizations, and Molloy College that is helping Long Islanders improve their homes and make Long Island a more sustainable place to live. New York State is currently providing thousands of homeowners with free energy assessments because making homes more energy efficient not only protects the environment, it also fosters economic activity and creates jobs in local communities.

All energy auditors in our program are Long Island-based and Building Performance Institute (BPI) certified. BPI is a national organization that sets the technical standards for contractors in energy-efficient building performance.

The Process

1 Tell Us About Your Home

The first step is a brief conversation with a Long Island Green Homes Energy Navigator where you tell us about your home and any potential energy efficiency issues. Our Energy Navigators utilize this opportunity to explain eligible rebates, discounts, and financing.

2 Receive a Free Home Energy Assessment

We will arrange for a certified Long Island professional who will conduct a comprehensive energy assessment of your home to identify any efficiency or health and safety related issues.

3 Post Assessment

After the assessment, your certified contractor presents you with a report of your home's energy efficiency. The itemized report details each efficiency upgrade option and how each option can improve your home's comfort, savings, and efficiency. Have questions about the report? Give us a call at **800-567-2850**.

4 Authorize the Work

You authorize any or all of the work that you would like performed by signing the final agreement with your contractor.

5 Make Energy Efficiency Improvements

After the work is completed, you'll start saving money on your energy bills right away! You'll also enjoy these added benefits that come from a home that is more energy efficient – comfort, a lower carbon footprint, and a higher resale value.
