**Re: Monthly Progress Report for January 10, 2022 to February 10, 2022**  
**Former Damascus Landfill.**  
**East Quogue, New York**  
**NYSDEC BCP Site #C152253**

Dear Ms. Sweet,

The Town of Southampton is pleased to submit this progress report to the NYSDEC regarding the remedial activities at the Former Damascus Road Landfill.

Since the previous Progress Report was prepared for the above-referenced site, additional activities that have been completed include the following:

- On January 28, 2022, Eric Weinstock of Wood and Tom Fox of D&B met with Melissa Sweet of the NYSDEC at the Damascus Road site in order to walk the site and discuss the project. The site walk included the locations for the planned upgradient and downgradient well clusters.
- The discussion also included the use of test pits for delineating the landfill boundaries in lieu of the use of the shallow soil borings.
- Ms. Sweet was in concurrence with advancing this work as part of the next phase of the investigation and was satisfied with the monthly reporting procedures currently in place.

In the following month, we plan to perform the following:

- The installation and development of an upgradient and downgradient well cluster within the site, a total of five monitoring wells beginning on or about February 14, 2022.
- Completion of 13 test pits to delineate the landfill boundaries beginning on or about February 22, 2022.

- Collection of groundwater samples for the five newly installed on-site wells for PFAS analysis.

Please feel free to contact me at 631 283 6055 x 1865 if you have any questions.

Respectfully,

A handwritten signature in black ink that reads "Francis Zappone". The signature is written in a cursive, flowing style.

Francis Zappone  
Deputy Supervisor
