Re: Monthly Progress Report for February 10, 2022 to March 10, 2022
Former Damascus Landfill.
East Quogue, New York
NYSDEC BCP Site #C152253

Dear Ms. Sweet,

The Town of Southampton is pleased to submit this progress report to the NYSDEC regarding the remedial activities at the Former Damascus Road Landfill.

Since the previous Progress Report was prepared for the above-referenced site, additional activities that have been completed include the following:

- Installed a total of five groundwater monitoring wells. Two wells were installed adjacent to existing NYSDEC well MW-2, including one intermediate well at 70 feet and one deep well at 100 feet. The three other wells were installed in an upgradient location (northern portion of the site) and included one shallow 40 foot well, one intermediate well at 70 feet, and one deep well at 100 feet.
- The five wells were developed by pumping in accordance with the work plan.
- A total of 13 test pits were completed in order to assess the extent of fill present within the Site.

In the following month, we plan to perform the following:

- Sample the five newly installed monitoring wells along with existing NYSDEC monitoring well MW-2 for PFAS analysis.
- Draft a technical memorandum summarizing the findings of the test pit investigation and the results of the groundwater sampling.

Please feel free to contact me at 631 283 6055 x 1865 if you have any questions.

Respectfully,

A handwritten signature in black ink that reads "Francis Zappone". The signature is written in a cursive, flowing style.

Francis Zappone
Deputy Supervisor
