Re: Monthly Progress Report for April 10, 2022 to May 10, 2022
Former Damascus Landfill.
East Quogue, New York
NYSDEC BCP Site #C152253

Dear Ms. Sweet,

The Town of Southampton is pleased to submit this progress report to the NYSDEC regarding the remedial activities at the Former Damascus Road Landfill.

Since the previous Progress Report was prepared for the above-referenced site, additional activities that have been completed include the following:

- We reviewed the PFAS data from the six groundwater samples collected in March 2022 from the five newly installed monitoring wells and the existing NYSDEC well MW-2; and,
- We also prepared the attached letter report to the NYSDEC summarizing groundwater sample data and test pit data. Based on that review, we believe using Geoprobe vertical profile borings along the downgradient toe of the landfill may not produce representative results at the depths where the samples are collected. Therefore, we are recommending that permanent monitoring wells be installed in lieu of the vertical profile borings.

In the following month, we plan to perform the following:

- The existing site survey does not include a complete set of horizontal x and y control points. An updated site survey will be prepared that will include a coordinate system for locating sample locations and the perimeter of the landfill.

- A schedule for the installation of on-site groundwater monitoring wells at locations, LBPB-1, LBPB- 3, LBPB– 4 and UGPB-2 will be provided and a utility clearance will be performed.

Please feel free to contact me at 631 283 6055 x 1865 if you have any questions.

Respectfully,

Francis Zappone
Deputy Supervisor
