Re: Monthly Progress Report for June 10, 2022 to July 10, 2022
Former Damascus Landfill.
East Quogue, New York
NYSDEC BCP Site #C152253

Dear Ms. Sweet,

The Town of Southampton is pleased to submit this progress report to the NYSDEC regarding the remedial activities at the Former Damascus Road Landfill.

Since the previous Progress Report was prepared for the above-referenced site, additional activities that have been completed include the following:

- D&B mobilized the drilling contractor to complete the remaining on-site groundwater monitoring wells.
- Installed two upgradient monitoring wells (UG-02S and UG-02I), both of which have been developed and are ready for sampling.
- Completed one downgradient soil characterization to 70 feet at LB-01.
- Installed three downgradient monitoring wells (LB-01S, LB-01I, and LB-03I).
- Completed one downgradient soil characterization to 70 feet at LB-03.
- Completed surveying at the site to develop a new scaled base map for the site that can be utilized to accurately locate on-site sample locations and other site features.

In the following month, we plan to perform the following:

- We plan to complete the installation of the remaining downgradient monitoring wells (LB-03S, LB-04S, and LB-04I) and develop them so they will be ready for sampling.
- We plan to sample all on-site monitoring wells, including the existing NYSEC wells, for a total of 16 wells.
- We plan to draft a new site base map showing all completed and proposed on-site sample locations.
- We plan to draft a summary report discussing the on-site groundwater data and recommendations for future on-site borings.

Please feel free to contact me at 631 283 6055 x 1865 if you have any questions.

Respectfully,

Francis Zappone
Deputy Supervisor
