RE: DAMASCUS LANDFILL SITE
146 DAMASCUS ROAD, EAST QUOGUE
SITE INVESTIGATION UPDATE - Off Site Test Wells

Dear Resident,

For the past several months the Town has been conducting a site investigation of the Damascus Landfill at 146 Damascus Road, East Quogue. The investigation is part of the NYDEC's periodic review of all abandoned landfills in New York State. The site investigation plan, approved and overseen by the NYDEC, requires several off site, down gradient, ground water testing wells. In order to meet this site investigation requirement, the engineering firm hired by the Town, D&B Engineering, to complete the site investigation will be drilling six off site wells within the Town right of way along Old Country Road and Lewis Road in East Quogue. The precise locations of the test wells, once verified, will be identified on a map posted on the Town website at <https://www.southamptontownny.gov/1652/Former-DAMASCUS-Landfill---East-Quogue> along with other information about this ongoing project.

This off site testing will commence on or about March 20, 2023 and continue through April 28th. Small, mobile well drilling equipment (see photo) will be positioned at each site location for 3 days and then relocated to the next site. The portable drill equipment will be removed after each day's drilling. Excess soils created by the drilling will be removed by the contractor. Appropriate cautionary signage for vehicles and pedestrians will be posted at the drill location. The contractor hired by the Town will work closely with the Town Highway Department and Southampton Police Department to minimize any traffic impacts and to assure that any disturbance to the roadbed and/or the road shoulder will be properly remedied.
