

PROJECT APPLICANT: Trustees – Town of Southampton

PROJECT TITLE: Engineering Design Services for the Water Mill Fish Passage at Old Mill Road

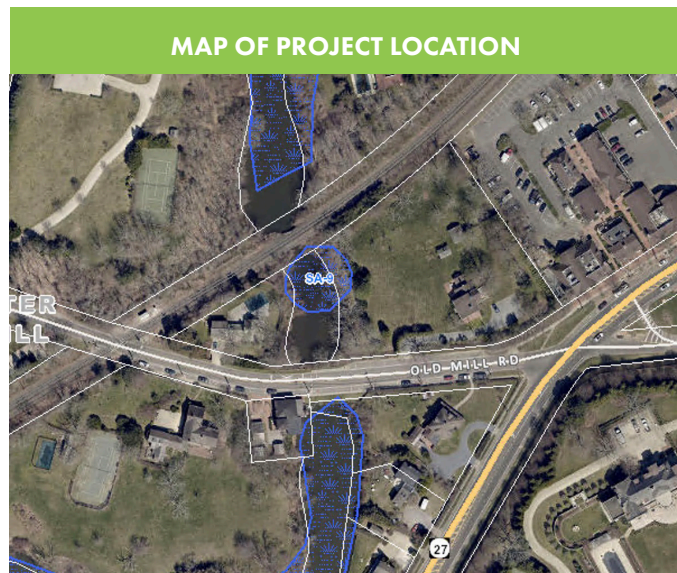

PROJECT TYPE: Aquatic Habitat Restoration

SCALE: Neighborhood/Watershed

APPROACH: Restoration

DESCRIPTION:

The Board of Trustees is looking to hire a qualified engineering firm to design a permanent fish passage under Old Mill Road in Water Mill. The fish passage will allow for the migration of alewives, and American Eel from Mill Creek to Mill Pond which will restore critical spawning and maturation habitats for the species. The project will restore aquatic connectivity and access to high quality freshwater spawning and maturation habitat for native fish species, enhancing their populations and increasing ecosystem resilience.

REQUESTED AMOUNT: \$ 174,550.00
